

The 2018 [Floodplain Management Plan](#) (FMP) was most recently adopted by all the county boards in Carson River Watershed. It serves as a regional planning guide to meet floodplain management objectives in the Carson River Watershed.

Please consider reviewing Section 4 on pages 32-37; it lists flood risk reduction and floodplain strategies.

Please consider reviewing additional information, especially in reference to your county.

In the [Appendices of the FMP](#):

1. Appendix B: Updated Rapid Evaluation of Carson River Counties (pages 19-42) list an assessment by County.
2. Appendix E: County Progress Reports – These list progress on suggested actions by each watershed county. (pages 150-185)

Extra Credit: It's helpful to understand that future funding requests to FEMA are selected a potential projects list from the [Discovery Report](#) (pages 79-85).
