Wild Harmony Ranch A Holistic Approach to Land Management

Breaking the Illusion of Normal

* Why?

* The Myth of Normal

• Normal: conforming to a standard; usual, typical or expected...

* It's all about profits...

• The best solutions are sometimes the most unprofitable...

How deep does the (health) rabbit hole go??

* Where does our food come from?

* What does our food eat?

* What does our foods, food eat?

"Let food be thy medicine and medicine be thy food."

-Hippocrates

HEALTH INDUSTRY

Suppression & Elimination

Ex. Suppress the immune system through; alkylating agents, corticosteroids, antimetabolites...

In "hope" of Elimination of dis-ease whilst also eliminating healthy biome and tissue

AGRICULTURAL INDUSTRY

Suppression & Elimination

Ex. Suppress the WEEDS & PESTS through; pesticides, herbicides ...

In "hope" of Elimination of growth/ pests whilst also eliminating healthy biome and soil

THE KNEE JERK SOLUTION

- Chemical Sterilization (Good & Bad)
- Synthetic Enrichment

"JUST BECAUSE YOU HAVE A HEADACHE,

DOES NOT MEAN YOU ARE DEFICIENT IN ASPIRIN"

- GEOFF LAWTON

BIOLOGICAL SYSTEM VIEW

o Takes into account "A Complex Biological System" integrating multiple species beyond a singular yield crop and requires collaboration of multiple species to support system

MECHANISTIC VIEW

O Attempts to simplify "A Complex Biological System" for the sole use of machinery to obtain a specific yield.

"If you want to make small changes, change the way you do things.

If you want to make major changes, change the way you see things."

Don Campbell

o Acquired in 2019

- 115 Acres
- 70 Acres in flood field (alfalfa hay)
- 20 Acres in riparian tree , alongside the Carson River
- No livestock on property (30 +years)
- Unirrigated for at least 2 years or more prior to 2019
- Monocrop of Alfalfa
- Fields conditions:
 - Large spaces between plants, no ground cover

WILD HARMONY RANCH

Guiding Principles

EARTH CARE

PEOPLE CARE

OBTAINING A YIELD

• EARTH CARE

- Keep the ground covered
- Reduce disturbance of the soil layers
- Plant diversity & Animal diversity
- Use of livestock and their manures on landscape
- Manage for what you want, not what you don't want (No Synthetics)
- Timing in all things matters (plants/ animals)
- Mimic Nature in as many ways possible

Bringing Life Back to Our Land...

NO "CIDES"

No herbicides, fungicides, pesticides, no chemical fertilizers.

WATER

Irrigation

COVER CROPPING

By hand and with animals

DIVERSITY

Animals, Seeds/ Plants

ROTATIONAL GRAZING

Mob stocking, timed rotations

meet our team

Property Drainage

Flood Direction

Summer Sun

Summer Winds

Fire Risk

Turbidity Traps

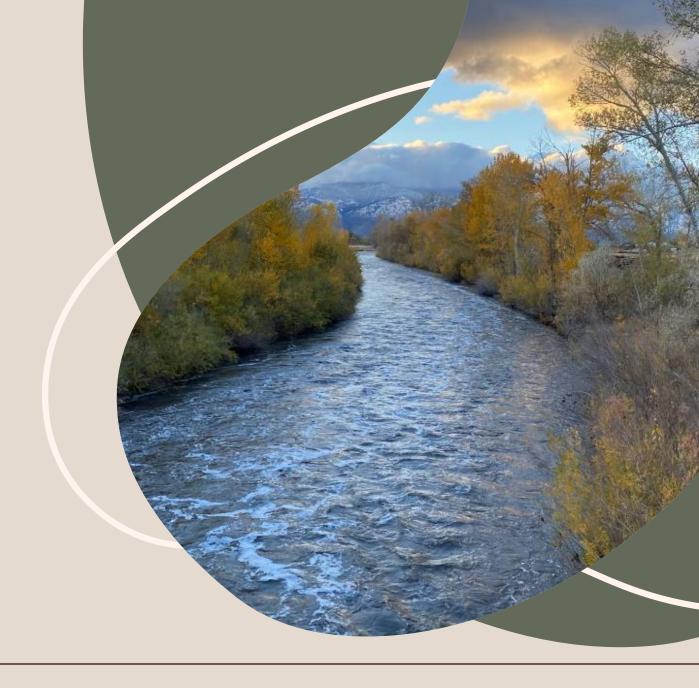

In the future...

- Further integrate tree systems into our fields
- Stabilize and retore riparian area located near the Carson River
- Integrate earth works (.i.e. sediment traps) to assist water absorption on our land and reduce soil run off

Seed List

COVER CROP

YELLOW MUSTARD
HYBRID SUDAN GRASS
MAXUM FIELD PEAS
BUCKWHEAT
FORAGE PURPLE TOP WHITE GLOBE
TURNIPS
OATS (COMMON)
HAIRY VETCH
WINTER RYE (COMMON)
BARELY (QUEST)

FIELD SEED

WHEAT GRASS INTERMEDIATE MANIFEST

WILDRYE RUSSIAN BOZOISKY

RYEGRASS PERENNIAL PASTURE

RYEGRASS ANNUAL MADRONE

WHEAT GRASS CRESTED HYCREST

SAINFOIN REMONT

ALFALFA LADAK 65

WHITE DUTCH CLOVER

CEREAL RYE FALL V.N.S

ORCHARD GRASS PROFILE

FESCUE TALL FAWN

BLUE GRASS SANDBERGH HIGH PL

RYEGRASS ANNUAL GULF

BROME SMOOTH

SAINFOIN SHOSHONE

CLOVER ALSIKE

RYEGRASS INTERMEDIATE RILEY

BLACK OIL SUNFLOWER SEED - ON EDGE OF

FIELD OR ON CHECKS NOT HAYED
